RE:

Notes from the meeting on 02/17/24 with Jeremy Beer, Foreign Policy Fellow, Senator Christopher Murphy office: World Quality Center for Naval Ships in Ukraine:  
The worries and concerns of the West and the East are resolved by America and Russia.

Dear All,

The creative laboratory institution Ukraine has such a category of people as professors who are located in buildings called universities. It is necessary to protect the category of universities in Ukraine, to clarify “and the category of universities in Ukraine”. Therefore, the Fermata Arts Foundation organization making trips to the countries of the post-Soviet space, including Ukraine, concentrated its attention on agreements of intent with professors and at the level of the rector with the university

professorial staff. This correspondence and agreements in the US were initially demonstrated in the office of Senator Murphy, first a congressman and then a senator among the office of Senator Murphy workers responsible for ... this super senator of America C. Murphy. The style of work is “suppress or develop,” but the situation radically changed among the management of Ukraine after one of the employees of the participants in the programs, Moscow programs, KVN<sup>1</sup>, energetically created by the leader Alexander Maslyakov, installed himself on the throne.

*Navalny*

Let us dwell on the connection between the Moscow, Kyiv, Russian Federation, Ukraine trails, and the KVN trails. Well, when at one of the sunrises on the stage of Ukraine, a guy from the Maslyakov's institution KVN Zelenskyy appeared on the president's pedestal, this concerned President Putin, a KGB worker with the location of his work in Germany, who Yeltsin introduced to American President Clinton. Both people, Putin and Zelenskyy, were formed in the linguistic ironic-satiristic field but in different socio-systems. Currently, these are different socio-systems, where President Putin specializes in one system, and President Zelenskyy specializes in another system, but both of them are connected. What are they connected to? KVN institute, Moscow, Maslyakov. One worked in the KGB and had Maslyakov as an employee. The other one interned with KGB officer Maslyakov, at KVN.

RE: Notes from the meeting on 02/18/24 with Jeremy Beer, Foreign Policy Fellow, Senator Christopher Murphy office: World Quality Center for Naval Ships in Ukraine:  
The worries and concerns of the West and the East are resolved by America and Russia.

*Continued.*

At the beginning, in communication with Jeremy Beer, Foreign Policy Fellow, Senator Christopher Murphy office, it was noted the well-known situational development of this [Putin] and that [Zelenskyy] individual has strong ties through education in the same institution, and this is, as it were,

<sup>1</sup> KVN = Club of the Funny and Inventive [people] is a Soviet and Russian television game show since 1964

the basis. Journalist Israel (Synkov) and journalist Ishutkina (of SCHWIPAR Centre for Innovational Development, at the same time Ishutkina is a director of the Fermata Arts Foundation) made a statement to an employee of Senator Murphy's office that the statement would be necessary to activate 50 American government offices (for each state) in the Kremlin.

This proposal was initiated as a proposal through correspondence to different offices of the governors: MA, NH, NY, and currently we intend to send the above letter to President Putin with the understanding that the issue of the presence of the country of America inside the walls of the Kremlin is necessary and sufficiently justified after the financing of Zelenskyy in the person (how historians will form and designate this personality and what position he held), but at present he is the President of Ukraine.

Putin's daughter, close to Putin's personality, as a family member, made a statement that all actions taken and necessary for the situation in Ukraine, taken by the country's President Putin, are all in the name of the good of the common man.

The worries and concerns of the West and the East are resolved by America and Russia.

*Continued.*

And for the common man, universities and Ukrainian universities are an important link in the life period, both in the active and passive periods, and in the youth period of life. Since President Putin defended his dissertation and the topic of his dissertation is also interesting and necessary for the common man, having a discussion forum in the Kremlin from representatives of America at the state level, state leadership and presidents of universities in these states is vitally important and necessary. This debatable conceptual line of communication for civilization is also necessary at this time.

*Senator Christopher Murphy (CT) Russian Foreign Policy Fellow Jeremy Beer, investor into the world*

We hope that after some period, but a short one, i.e. tomorrow, a super-smart, intelligent cohort of senators will give active support, since a significant amount of American financial support for Ukraine was allocated in a short period, today. A letter of support and a demand for a meeting with President Putin on this issue will be sent and a statement that this was done at one of the meetings Jeremy Beer, Foreign Policy Fellow, Senator Christopher Murphy (CT) office is a fairly high, even super high recommendation for the beginning of a discussion on this issue Journalists - President - Governor with the retinue of the state of America - President, and we will not look further for now, but many in the person of the states of America and the President of the Russian Federation Putin are representatives of a sufficiently high level to begin to authorize the formation of this project “World Quality Center for Naval Ships in Ukraine” by a statement from the American side about this form of America-Russia cooperation.

P.S. A short summary in the form of a system dynamics map will also be developed as a supplement.

Organizational culture framework:

- Introducing an effect of errors with delayed-action detonating effects 1-2-5-10-40 years later, when a self-destruction of this product will take place.
- All work in the organizations of the shipbuilding industry from the worker to the upper management is built on fear of being fired. [Helene Anderson, DASN(RDTE) CHSENG, Director of Systems Engineering, office of The Honorable Sean J. Stackley Assistant Secretary of the Navy]

Journalist Israel (Synkov) and Ishutkina discussed the payment of Ishutkina’s salary in the office of Congressman Tim Burchett:

President of the company,  
Give a meeting on the issue of salary payments from July 2011 to the present day.

These notes are to be sent to a shipbuilding company in America.
